EDUCATION

Covenant University

Expected August 2027

Bachelor of Engineering in Computer Engineering

Ogun, Nigeria

Clubs: GDG Club, StartUp Lab, Chess Club, Literary and Debate Society

Relevant Coursework: Data Structures and Algorithms, Software Engineering, Computer Architecture, Operating Systems, Algebra

EXPERIENCE

Squaay

July 2025 – Oct 2025

Software Engineer Intern

Lagos, Nigeria

- Served as the primary mobile engineer at a social food startup, collaborating with a backend engineer and designer
- Implemented authentication and onboarding flows for both users and vendors
- Create reusable components, boosting UI development speed by 30%

SoSo Care

July 2024 – Oct 2024

Software Engineer Intern

Lagos, Nigeria

- Built a functional travel insurance page pushed to production, resulting in additional revenue
- Diagnosed and resolved issues across 5+ pages, improving site performance by 90%
- Overcame the challenge of working on an existing codebase by quickly adapting to the code structure and implementing clean, efficient solutions

PROJECTS

Ticklo | *React.js, Vue.js, Twig/Php, TypeScript, LocalStorage, Git, Tailwind*

Oct 2025

- Built a full-stack CRUD application supporting 100+ tickets by implementing authentication, routing, and state management across React, Vue, and PHP frameworks
- Improved form submission accuracy by 95% by implementing Zod schema validation with React Hook Form and VeeValidate, preventing invalid ticket data entry

trackit | *React, TypeScript, Firebase, Git, Tailwind*

July 2025

- Built a habit tracking web app with user authentication and real-time data using Firebase
- Designed a clean UI focused on ease and user experience, users can create, tick, and track progress in under 10 seconds

Cineo | *Next.js, TypeScript, Firebase, Tailwind, TMDB API*

March 2025

- Built a fast movie engine with filter feature using Next.js, Typescript, and TMDB API, improving user search efficiency by 40%
- Implemented efficient API requests, cutting down data fetch time by 50%

TWAE - Personal Blog | *React, TypeScript, Firebase, Tailwind*

April 2025

- Built a responsive blog using React and Firebase for backend services, handling authentication and real-time data storage
- Implemented TypeScript for type safety and improved code maintainability, showcasing strong front-end engineering skills

Lead Tracker | *HTML, CSS, JavaScript*

Oct 2024

- Built a lightweight Chrome extension with HTML, CSS, and JavaScript to save and organize browser tabs as leads, enhancing user productivity and link management
- Implemented local storage for persistent data, ensuring seamless access to saved leads across sessions

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Python, C, HTML/CSS, Bash

Frameworks: React, React Native, Next.js, Tailwind

Tools: Git, Linear, Firebase, Prisma, Postman, DataGrip, Slack

Concepts: Software Engineering, Mobile, Frontend, Agile Methodologies, AI
